simulated liquid (water) leak

fuel spill fire

KFT's mobile Tanker Hazmat FireTrainer® O-100 replicates transportation fires and hazmat emergencies.

The Tanker Hazmat FireTrainer® O-100 creates hot, challenging fires to train both new recruits and seasoned firefighters. The propane-fueled fires burn cleanly, minimizing local environmental impact. All fires are controlled by the instructor, and can be ignited or extinguished at the touch of a button. This means greater fire fighter safety and training efficiency. The trainer also incorporates a number of hazmat rupture and leak features.

All equipment packs easily onto the 40-ft mobile trailer. The trainer can be towed by a conventional over the road tractor to deliver training wherever needed.

KFT's FIRETRAINER® O-100 systems are certified to UL safety standards by Intertek (ETL), a Nationally Recognized Testing Laboratory (NRTL).

Features & Specifications

- 40-ft x 6-foot diameter tanker
- two, 4 x 6-foot fuel spill fires
- relief valve fire
- flange fire
- independent, constant pilot flames
- control panel
- tank rupture training kit
- four compartments for hazmat training
- cooling water mist system with fire hose interface connector
- catwalk with railings along on top of tanker
- all required propane and electrical lines/connections
- storage racks on trailer for equipment transport

Warranty & Support

- onsite startup and operator training
- 12-month parts warranty with toll-free support
- 24/7 toll-free technical phone support
