OVERVIEW

KFT's portable Hose Line FireTrainer® O-100 can be used as a standalone training tool to replicate fuel spill or ground fires in addition to several other types of fire scenarios.

The Hose Line FireTrainer® O-100 provides hot, challenging fires to train both new recruits and seasoned firefighters. The FireTrainer® O-100 is a completely portable unit that can be setup and operated by one person. All the fires are controlled by the instructor and are easily ignited and turned off. This means greater fire fighter safety and higher numbers of firefighters that can be trained per day.

The FireTrainer® O-100 is constructed of stainless steel, making it robust and easy to maintain, and it burns environmentally acceptable propane. Safety is paramount, with the operator/instructor controlling a "deadman" button on the control pendant that, when released, instantly stops the fire.

Optional props are offered for the O-100 to create various fire training scenarios, such as a Christmas tree, propane

cylinder, BBQ grill, commercial dumpster, car, truck, helicopter, F-16, split pipe flange, paint locker, motor generator, and horizontal propane tank.

AFTER SALES SUPPORT

All KFT Fire Trainer products are backed by the support of our worldwide service department. With over 20 service technicians, dedicated full time to KFT Fire Trainer and strategically located around the world, all KFT Fire Trainer customers can expect the very best in timely support by factory trained personnel.

CORPORATE QUALIFICATIONS

With deliveries of hundreds of live fire trainers worldwide over the past 35 years, to all types of fire training professionals, KFT Fire Trainer has established itself as the world's leader in the supply of gas fueled live fire trainers.

SAFETY ENSURED

- inextinguishable pilot flames guarantee each fire ignites on command
- operator "deadman" control ensures safety during training exercises

ENVIRONMENTALLY SOUND

- Environmentally Sound
- fueled by clean burning propane
- eliminates concerns of local air pollution and water pollution
- low set-up and clean-up time, more training time

Commercial Dumpster Prop

The Hose Line FireTrainer® O-100 is a convenient means of training students in the basic firefighting skills. This "turnkey" training system permits live-fire training in a safe, controlled and environmentally sound manner. In addition, having training capability locally results in more frequent and increased emergency preparedness.
