Structural FIRETRAINER® T- 4000 Confined Space Trainer

The Confined Space Trainer holds two containers, one vertical and one horizontal. The horizontal container simulates a tight crawl space, while the 40-ft. high interior repel unit is designed to simulate an airbase missile silo for military purposes or rappelling into a sewer in an industrial fire scenario.

Delivered: March 2007; September 2009

Fueled by: Propane
